        <h1>Assignment 2.2 - Building a Web Page Exercise, Part 2</h1>
        <h2>Chapter 1: HTML</h2>

        <p class="intro">
            Hello, my name is Juan Macias Vasquez and am now in my second year of
Bellevue university after going back to school.
            I am currently trying to get my degree before going for my certificates
to get a programming job in the future.
            I live at home with my parents, my two little sisters, and three cats. I
have a cat and so do each of my two sisters.
        </p>

        <p>
            I have lived in Colorado most of my life and have loved messing with
electronic ever since I was a kid.
            The main reason was because I had always had to do maintenance on my
family's computer as a kid because we couldn't afford another one.
            I had always loved finding out things to make it run better like getting
rid of things like bloatware, getting programs to run better on the low end hardware
and cleaning the parts safely.

        <p>
            I have only really used html in high school once and don't really have
any experience with it.
```

```html
                I have enjoyed my tech classes at Bellevue a lot so far and liked
learning things like python.
                I have liked classes here a lot more compared to my previous school and
have learned a lot more than before.
        </p>

        <p>
                One of my hobbies is to fix older electronics that I get for cheap at
places like thrift stores.
                I mainly do older gaming systems because they are a lot easier to fix
than things past the PlayStation 2.
                I have enjoyed learning how to do things with software in my current
classes though and love learning new things I can do in it.
                I hope to learn a lot more in class and future classes at Bellevue that
will be fun to use in a job.
        </p>

ASSIGNMENT 2.2 – BUILDING A WEB PAGE EXERCISE, PART 2

Chapter 1: HTML

Hello, my name is Juan Macias Vasquez and am now in my second year of Bellevue university after going back to school. I am currently trying to get my degree before going for my certificates to get a programming job in the future. I live at home with my parents, my two little sisters, and three cats. I have a cat and so do each of my two sisters.

I have lived in Colorado most of my life and have loved messing with electronic ever since I was a kid. The main reason was because I had always had to do maintenance on my family's computer as a kid because we couldn't afford another one. I had always loved finding out things to make it run better like getting rid of things like bloatware, getting programs to run better on the low end hardware and cleaning the parts safely.

I have only really used html in high school once and don't really have any experience with it. I have enjoyed my tech classes at Bellevue a lot so far and liked learning things like python. I have liked classes here a lot more compared to my previous school and have learned a lot more than before.

One of my hobbies is to fix older electronics that I get for cheap at places like thrift stores. I mainly do older gaming systems because they are a lot easier to fix than things past the PlayStation 2. I have enjoyed learning how to do things with software in my current classes though and love learning new things I can do in it. I hope to learn a lot more in class and future classes at Bellevue that will be fun to use in a job.
